

HLL - HELMAC LABEL LOADER

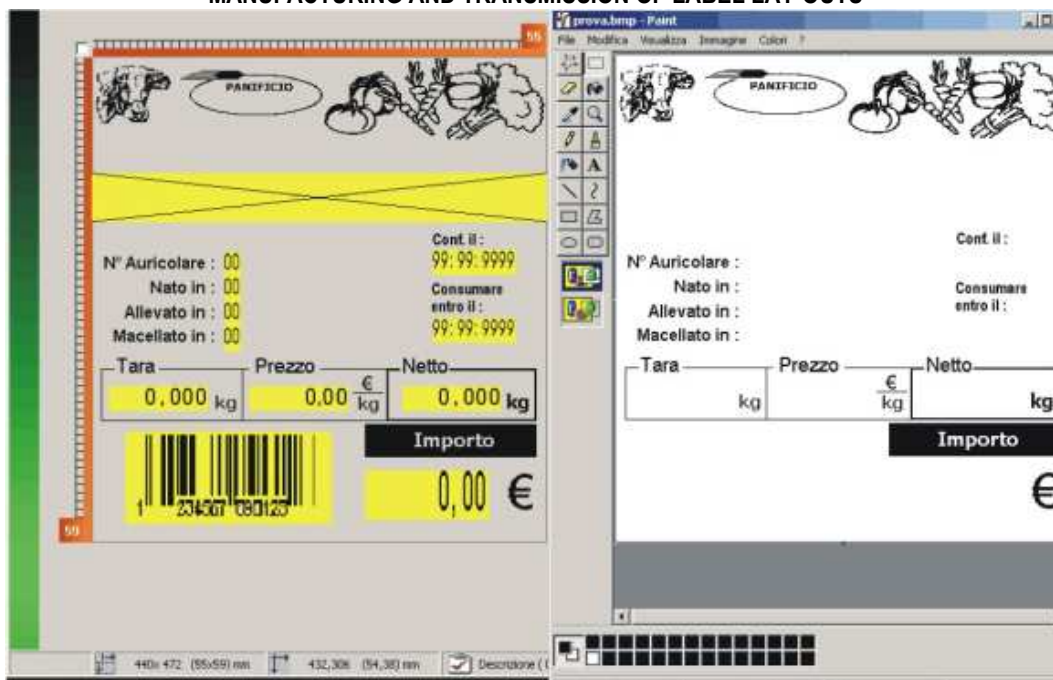

Software for the design of the labels, logos, and for the maintenance of the firmware of the Helmac products.

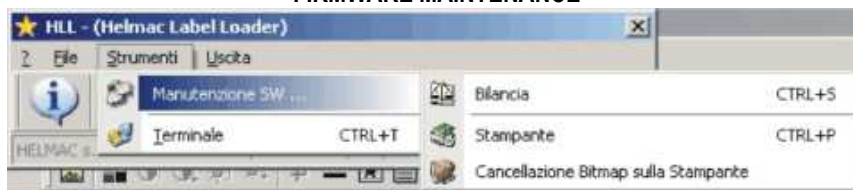

FUNCTIONS

- HLL allows to edit, draw, and load labels and logos on the Helmac scales. Thanks to a tool for the design of the label, it is possible to configure simply and intuitively the variable printable fields: logo, product description, traceability, formulas, weight, tare, price, etc.
- Possibility of loading the firmware updates for the CPU and the printer interface (where present).
- Check the presence of the communication with the I/O ports on the scale.

MANUFACTURING AND TRANSMISSION OF LABEL LAY-OUTS
