

QUAD: 4 SCALES IN 1!

QUAD

Quad: 4 scales in 1!

QUAD: indispensable for the weighing of bins, cans, pallets and other bulky items, directly where you need it!

OPTIONS UPON REQUEST (only available at time of order)

- CE-M 2000e approval (ECEM1B option).

Revolutionary weighing modular system composed of 4 portable platforms and a weight indicator carried in a case, easy to install and use. Particularly suitable for weighing bulky items such as bins of any size, cans, boxes, etc., allowing to weigh directly where it serves on any flat resting surface. GREAT SAVING OF SPACE AND TIME IN THE WEIGHING OPERATIONS!

TECNIKAI JELLEMZŐK

- 4 platforms, with a very thick anodized aluminium structure. Sturdy and reliable, and equipped of an off-center aluminium load cell (Q10P and Q20P models) or 4 aluminium load cells (Q100P and Q200P models).
- Equalised junction box, with 4 connectors + one 3m cable including connector for connection to indicator.
- Fitted with a carrying handle, adjustable levelling feet, integrated level, and 3 meter connection cable, including a connector.
- Weight indicator in a practical, lightweight, and extremely compact carrying case, with an LCD backlit 6-digit 25mm display, and 5-key simplified keyboard.
- Power supply through built-in rechargeable battery. Operating time of about 40h.
- As an option, remote control for using the scale from a distance and attached thermal printer for printing the weigh data.

FUNCTIONS

- High resolution weight display
- Semiautomatic tare or manual entry of the tare value
- Totalisation (sum) of the executed weighs, with display and printing of the total
- + / - tolerance check
- Pieces counting

KEYBOARD FUNCTIONS AND REMOTE CONTROL (optional)

- Clearing
- Tare
- Lock / Unlock function
- Simple printout / Printout of the total
- On / Off (only from indicator)

I/O SECTION

- RS232 serial port, for connection to the PC
- RS232 serial port, for printer version
- Infrared input (for optional remote control management)

Available versions

Code	Description
Q10P	QUAD system made up with 4 300x300 platforms in very thick anodised aluminium, with aluminium IP65 load cell and 3m connection cable. IP67 junction box with 3m connection cable; weight indicator in a practical transport case, along with integrated printer and remote control; 1000kg capacity, 0,5kg division.
Q20P	QUAD with 4 350x350mm platforms in very thick anodised aluminium, aluminium load cell and 3m connection cable. Junction box with 3m connection cable; weight indicator in a practical transport case, along with integrated printer and remote control; 2000kg capacity, 1kg division.
Q100P	QUAD with 4 400x300mm platforms in very thick anodised aluminium, aluminium load cell and 3m connection cable. Junction box with 3m connection cable; weight indicator in a practical transport case, along with integrated printer and remote control; 10.000kg capacity, 5kg division.
Q200P	QUAD with 4 400x300mm platforms in very thick anodised aluminium, aluminium load cell and 3m connection cable. Junction box with 3m connection cable; weight indicator in a practical transport case, along with integrated printer and remote control; 20.000kg capacity, 10kg division.
